Made>in>Moon designers present a line of ultramodern and stylish wear, which blends in the latest in textile innovation and design, inspired by urban high street fashion and the re-discovery of bamboo fiber as the latest chic & cool.

Natural bamboo fiber: 1. gives your skin a chance to breathe free. 2. has particular and natural functions of anti-bacteria, bacteriostasis and deodorization. 3. absorbs and evaporates your sweat in a split of the second. 4. provides you with comfort in hot summers: apparels made from bamboo fibers have a naturally cooling effect: keep the temperature by 1-2°C degrees (2-3°F) lower than usual textiles.

The present collection contains three accessory items with different constructions in each we try to show our creative credo: new materials + new needs. All items are available in three colours: natural white, moon-green and black. Enjoy the luxury of the new age.

accessories

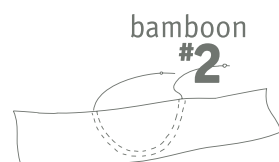

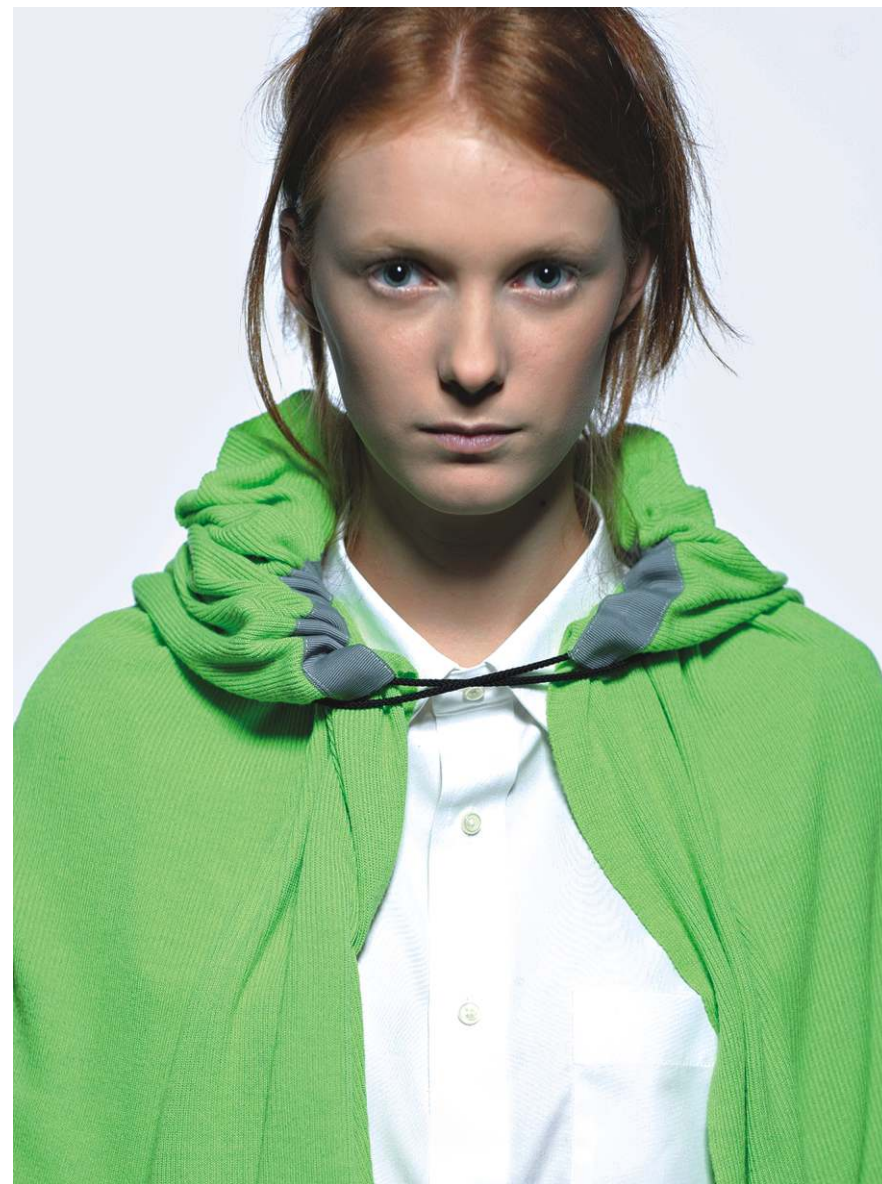

This model of the unisex scarf is for real urbanites always in a hurry but attentive to detail and style. The pocket inside the scarf can serve as a place to keep/hide small things and, of course, all that what one would like to keep close to one's heart.

Because of its construction this model is for innovative minds.
The scarf will serve them as the flexible cloth which can be worn every day differently.
With the help of adjusted bands you can even transform it into the hood.
It will always feel your mood the right way!

This top end model is for true individualists.
By wearing it you will always be one head above in the crowd of the smartly dressed.
This unique accessory will help you to complete your personal dresscode on the go.
